VALUE PROPOSITION

I bring over 8 years of experience in embedded and automotive software development, now making a deliberate move into Cloud, DevOps, and Platform Engineering roles. With hands-on experience in AWS, Terraform, Kubernetes, and CI/CD pipelines — backed by certifications and projects — I build on a strong technical foundation. My focus is on modern cloud infrastructure, GitOps workflows, and AI-adjacent platform solutions.

Software Foundation

From embedded systems to cloud infrastructure

Cloud/DevOps in Practice

Hands-on with AWS, Terraform, Kubernetes and CI/CD projects

Pain-Driven Motivation

DevOps gaps as a developer sparked this transition

SELECTED PROJECTS

nawazishkhan.click: Multi-Cloud Portfolio Deployment - Personal website deployed across AWS, Azure, and GCP — demonstrating full GitOps and observability setup across three cloud providers.
